1. Executive Summary

Bhat Foundation Welfare Society, in collaboration with Ibn Sina Hospital, organised a two-day Mega Free Medical Camp on 6 and 7 April 2026 at Ibn Sina Hospital, Ompora Budgam. The initiative was designed to improve access to healthcare and reduce the financial burden on people requiring medical consultation and diagnostic services.

The event recorded around 1,500 patients in attendance. The event report records 1,500 free consultations, 200 free USG examinations and 600 laboratory tests. The press release further records free pathological services and essential medicines being provided to patients in need.

The camp brought multiple specialties together under one outreach initiative, including orthopaedics, gynaecology, rheumatology, general medicine, ENT, cardiology, general surgery, physiotherapy, paediatrics, dental and urology. The activity also enabled patients requiring further treatment or surgical intervention to be identified and guided for appropriate referral.

2. Impact at a Glance

Indicator	Reported Reach	Reported Value	Impact
Patients / consultations	1,500	₹4,50,000	Free access to consultations
USG examinations	200	₹1,02,600	Diagnostic support
Laboratory tests	600	₹90,025	Investigative support
Total recorded service value	2,300 service instances*	₹6,42,625	Reduced direct patient cost

**Service instances are the three reported activity counts added together; this is not a unique-beneficiary count.*

3. Event Profile

Event	Mega Free Medical Camp
Dates	6th & 7th April 2026
Venue	Ibn Sina Hospital, Ompora Budgam
Organiser	Bhat Foundation Welfare Society
Collaborating Institution	Ibn Sina Hospital
Target Beneficiaries	General public, with emphasis on underprivileged sections
Primary Objective	Provide free healthcare services and social welfare

4. Purpose and Objectives

- Provide accessible healthcare services without consultation charges for participating beneficiaries.
- Support early detection and diagnosis through free examinations, laboratory investigations and USG.
- Reduce the immediate financial burden associated with specialist consultations and diagnostic services.
- Increase awareness regarding preventive healthcare and the importance of regular medical check-ups.
- Identify patients requiring further treatment or surgical intervention and guide them towards appropriate referrals.
- Strengthen community-oriented public health outreach and social responsibility.

5. Programme Implementation

The camp was implemented as a coordinated hospital-based outreach activity. Patients attended the facility for consultations and diagnostic support, while medical and paramedical personnel facilitated clinical services across multiple specialties. The event photographs show patients waiting in hospital areas, staff interaction, consultation activity and campaign visibility within the hospital.

According to the press release, the medical team included specialists in gynaecology, paediatrics, orthopaedics, surgery, dental care, physiotherapy, urology, radiology, rheumatology and general medicine, supported by paramedical staff.

6. Services Delivered

Service	Reported Quantity	Reported / Stated Value
Free medical consultations	1,500	₹4,50,000
Free USG examinations	200	₹1,02,600
Laboratory tests	600	₹90,025
Free pathological support	Provided	Value not separately stated
Essential medicines	Provided	Value not separately stated

7. Medical Specialties and Professional Support

The press release identifies a broad multi-specialty service mix. The documented specialties include:

- Orthopaedics
- Gynaecology
- Paediatrics
- Rheumatology
- General Medicine
- ENT
- Cardiology
- General Surgery
- Physiotherapy
- Dental Care
- Urology
- Radiology

8. Outcomes and Community Impact

Impact Area	Documented Outcome
Improved access	The camp provided free consultations and diagnostic services, making healthcare access easier for people who might otherwise face direct costs.
Early detection support	Free laboratory investigations and USG examinations created opportunities for conditions requiring further assessment to be identified.
Financial relief	The event report records ₹6,42,625 in value across consultations, USG and laboratory tests, representing services delivered without charge to participating patients.
Multi-specialty access	Patients could access multiple specialties through a single organised outreach initiative.

Referral pathway	Patients requiring additional treatment or surgery were identified and guided for appropriate referrals.
Health awareness	The report states that the initiative increased awareness of preventive healthcare and regular medical check-ups.
Institutional outreach	The camp strengthened the foundation's role in community welfare, public health outreach and social responsibility.

9. Photographic Evidence

Patient waiting and consultation environment at the hospital.

Medical consultation and documentation activity during the camp.

Camp publicity and patient presence at Ibn Sina Hospital.

10. Reported Service Value

The event report assigns monetary values to three categories of services: free consultations, USG examinations and laboratory tests. Based on those figures, the documented value totals ₹6,42,625.

Category	Reported Value	Share of Reported Total
Consultations	₹4,50,000	70.02%

USG	₹1,02,600	15.97%
Laboratory tests	₹90,025	14.01%
Total	**₹6,42,625**	**100%**

11. Follow-up and Sustainability

The press release records the foundation's intention to organise additional free medical camps across Jammu & Kashmir to extend healthcare access to underprivileged sections of society. It also notes previous medical camp activity at Beerwah and Gurwait Khansahib Budgam.

For future camps, the documented experience can support continued multi-specialty outreach, stronger patient referral tracking and systematic documentation of beneficiary-level outcomes. These are proposed reporting improvements rather than activities claimed to have occurred during this camp.

12. Documentation Notes

- The source documents report approximately 1,500 patients in attendance and separately report service counts for consultations, USG and laboratory tests.
- The 2,300 figure in this report is the sum of reported service instances and should not be interpreted as 2,300 unique beneficiaries.
- The source documents do not provide a beneficiary gender/age breakdown, individual case outcomes, or a separately itemised expenditure ledger for every camp component.
- The monetary values presented are those recorded in the supplied event report; they are presented as reported service values rather than independently audited expenditure figures.

13. Conclusion

The Mega Free Medical Camp conducted on 6–7 April 2026 represents a documented community-health outreach intervention by Bhat Foundation Welfare Society in collaboration with Ibn Sina Hospital. The camp combined free consultations with diagnostic support and multi-specialty access, reaching around 1,500 patients according to the press release. The event report records 200 USG examinations and 600 laboratory tests in addition to the consultations.

The documented results demonstrate the value of coordinated healthcare outreach in reducing immediate patient costs, supporting early diagnostic assessment, improving awareness and connecting patients with further treatment pathways. The photographic evidence included in this report complements the written documentation by showing the event environment and participation.
